

1 Abstract

Explains briefly the paper and what it aims to do.

2 Introduction

Introduce the scope.

3 Problem

Something about the MEOW monitor, and expanding it. Probably also why it would be a good idea(?)

4 Background

Explaining the existing code and what it does and why.

5 Method

Coding and shit

6 Results

It works! (Hopefully. I haven't made it yet)

7 Discussion

Why did I do that? What could I have done instead? Why would that have been way worse and stupid?

8 Future Work

What should someone do if they want to fix my mistakes, or expand on them further.

9 Conclusion

Something about being the best (but be humble about it).
